

JCR Data Updates

After the initial annual JCR release is published, this section will be updated weekly with notes about pending additions or adjustments to the JCR data. All changes will be reflected in the JCR application when the dataset is reloaded and closed later in the year. Citation metrics published in this section can be considered official JCR data.

This is unlikely to change, but should be considered provisional until the data are reloaded later in the year.

A note about the Cardiac & Cardiovascular Systems category: Just prior to release of the 2014 data we became aware of a significant overcounting of citations to European Heart Journal Supplements, currently listed as the #2 ranked journal in the category. An accurate Journal Impact Factor will be listed here in Notices shortly. We provide this advance notice that rankings for many journals in this category will shift upward by one position when the data are reloaded in September.
